

firms and corporations for use and consumption at their respective places of business.

This does not conflict with the spirit of the present grant of the Natural Gas Company of West Virginia, as their business is almost exclusively domestic service, and this is the way in which it is intended to be used. The original intention of the Manufacturers' Gas Company was to aid the business interests of the city through a supply of natural gas from competing sources. We feel that your honorable body will be interested in this matter, and will lend your support and influence to a measure which cannot but benefit the business interests of this community. Yours truly, THE WHEELING NATURAL GAS CO. By W. W. Rogers.

Mr. Henry Baer spoke of the importance of a bounteous supply of natural gas for Wheeling industries. In the past we have been backward. If we had been wide-awake years ago the Natural Gas Company of West Virginia would not be today what it is. The grant and the Manufacturers' company would not to-day be attempting to get a secure foothold. Senator Whitaker did not think the adverse action of the council committee on the application of the company the proper thing. He did not believe the city had the right to grant the West Virginia Company an exclusive privilege. Exclusion of grants in other fields have been knocked. He favored giving the Wheeling company an equal show with the West Virginia company, and letting the courts decide the matter. The West Virginia Company has not lived up to its compact, and we are at its mercy while a company having a bounteous supply of gas is knocking at Wheeling's doors for admission. He was informed that the West Virginia Company's supply is limited, and will fall short in cold weather. The West Virginia Company is acting a "dog in the manger" and ought to withdraw its opposition to the Wheeling company, when it is unable to fill the demand in Wheeling. The Wheeling Company, he believed, would accept a franchise for furnishing gas both for domestic and industrial use, and then the city would be assured of plenty of gas for both purposes; something the West Virginia Company cannot give.

He recalled incidents when the Manufacturers' (Wheeling) company entered Wheeling several years ago. It secured an entrance to this city, only after a fierce battle with the West Virginia Company's influence, and under onerous conditions. It is a matter of regret that this community is held up by the exclusive franchise bond. This same company, by a violation of faith, inflicted twenty-cent gas on the citizens of Wheeling. They will violate their faith again whenever it suits their own purposes. Give the people the benefit of competition. The position we occupy is a burning shame, and should be changed. Personally and selfishly, he would rather have the Wheeling company confined to the manufacturing field, as there would be sure to be more and possibly cheaper gas for manufacturing consumption (in which he is interested), but he would not take such a selfish stand when the good of the community is at stake.

Mr. C. D. Thompson, of the board of public works, made an explanation on behalf of the board. It has been held against the Wheeling company furnishing gas to certain business houses, after securing an opinion from City Solicitor Boyce. He believed that if the Wheeling company would give something for a franchise, the council committee would have recommended the amended ordinance favorably to council.

Senator Whitaker did not see how the city could ask for a consideration from the Wheeling Company when the Natural Gas Company of West Virginia had been allowed to come in without a consideration. He claimed the market here for gas should be free and open. The city solicitor should not waste his time bickering over technicalities that foster a monopoly. Had the West Virginia company been successful when the Wheeling Company was given a limited field here, they would not have been a foot of gas burned in a Wheeling mill. The city should throw off the shackles thrown around us by the West Virginia Company; their ordinance by which the price of gas was advanced to twenty cents was bald, bare-faced robbery. The people should be given every opportunity to benefit themselves. Let the Wheeling Company be given the opportunity to give the people of Wheeling the benefit of its great gas supply. Council should understand this, and should stop this business of fostering a gas monopoly. This community is under no obligations to the Natural Gas Company of West Virginia. Throw open the doors of competition.

Mr. Baer moved that the president and secretary be requested to communicate to council the chamber's desire, that the Wheeling company's application be granted. He uses in his own business gas, both from the Wheeling and West Virginia companies. The Wheeling company's gas costs six cents and the West Virginia company's gas costs him twenty cents. Mr. Baer said the Wheeling Company had been charging small manufacturing establishments twelve cents a thousand for gas, but since the Cameron field was developed, the rate has dropped to six cents. The West Virginia company charges twenty cents, less 10 per cent, or eighteen cents.

Senator Whitaker introduced a resolution, as a substitute for Mr. Baer's motion, that the city should throw open the doors to the Wheeling company. After consultation with Mr. Baer, Senator Whitaker withdrew his motion, and Mr. Baer's motion, mentioned above, was passed.

At 11 o'clock the chamber adjourned.

IN THE CIRCUIT COURTS.
Judge Paul Has Several Cases Before Him for Decision.

Yesterday in Part II of the circuit court, Judge Paul, several cases were considered. That of W. C. Brown against the West Virginia Printing Company was transferred from Part I to Part II, and the trial set for December 2. This is a case that will be watched with interest by the legal fraternity, as it will be a landmark litigation, in which he remembered one, Crawley, last summer got out a souvenir book on Wheeling, entitled the "Wheeling Register History of Wheeling." W. C. Brown, the photographer, made photographs from which engravings for its illustration were made. Brown supposed the work was being done for the company, but when he handed the bill he was informed that the work was for Crawley individually. The suit is brought in an endeavor to show that the work was really performed for the West Virginia Printing Company. If a decision in favor of Brown is handed down, other suits will be brought against the company. If the decision is adverse to Brown, there will be no other litigation.

In the case of Fannie Long vs. Stephen A. Wilcox and others, the plaintiff came not when the case was called in court yesterday. Recovery of the goods in controversy, valued at \$32.20, was given Wilcox, et al.

In the case of William McWilliams vs. Valentine Leibold, for damage caused by McWilliams falling through a grating, there was a plea of not guilty. The jury found for the defendant and the counsel for the plaintiff moved for a new trial, the motion for which will be argued on December 5.

DR. BULL'S Cough Syrup takes the lead of all cough preparations on our shelves. Carpenter & Palmer, Jamestown, N. Y.

Low Rate Excursion to Chicago, Ill., via Baltimore & Ohio Railroad.

On November 28, the Baltimore & Ohio railroad will sell excursion tickets to Chicago, Illinois, at the rate of \$9.00 for the round trip, good for return on all regular trains until December 2, inclusive.

For further information, call on or address any Baltimore & Ohio ticket agent, or L. S. Allen, assistant general passenger agent, Chicago, Ill.

A GREAT POOL.

The Benwood Pool May Rival the Sistersville Field.

M'FARLAND FARM PRODUCER

Is Making 1,300 Barrels a Day, and Makes the Outlook for the Benwood District Bright—Vast Territory Has Been Opened Up—An Area of Twelve Miles Square Is Now Being Worked—Some of the Recent History of the New District.

For the past year the oil fields of the southwest, and especially of the Sistersville field, have not been coming to the front with anything of more than ordinary importance, but have been bringing in a few wells of the ordinary calibre. The talent had commenced to think that the oil belt in this section of the country had been defined and that with the old Sistersville pool, the largest oil producing territory of the southwest had been found and passed by. It has looked for the past year as though such was the case, but within the past week there have been indications now that a pool has been opened up that will be fully as large if it does not distance the original Sistersville field.

The field is that of Benwood, on the Ohio side of the river, in Monroe county, in which so many good wells have been drilled in during the past few weeks. Since the opening of this field there have been quite a number of very good wells drilled in, all of which started off at the gusher rate, but in a short time declined to ordinary wells of the size usually found in the old field—about 100 barrels a day.

On Friday last, however, the banner well of the territory was drilled in and it looks now as though the future of that territory is assured. The well was that of Crawford & Treat, on the McFarland farm. When the well reached the top of the sand it showed up for a good producer and commenced spraying some oil. The drillers immediately shut it down and made arrangements for saving the precious fluid. It was not thought necessary to erect more than two 250 barrel tanks and it was not expected that the well would amount to more than 100 barrels a day, and only that amount of tankage was put up. After the tankage had been erected the well was drilled deeper and at four feet in the sand the first pay was struck. The well immediately commenced to flow and from that time until the present it has been flowing at such a rate that it has been impossible to do anything with it. The casing head was put on and from this there are three three-inch lead pipes to the tanks which have been erected and it is almost impossible to get tankage up fast enough to keep the oil from going to waste. It is estimated that the well is doing better than 1,300 barrels a day. The reason so much tankage is being erected at this well is because it is a considerable distance ahead of developments and as yet the pipe line company has not been able to make connections. It is likely the well will be connected up within two days and then an actual gauge of its production can be made.

This well is one of the most important that has been drilled in, in this section, for a long time and will make business unusually active in this part of the southwest. The well is located directly north of the former development in this field one mile and has opened up a vast amount of territory. It is situated on a small piece of the McFarland farm, which contains about forty acres, and enhances the value of many hundreds of acres of territory in that part of the field. As for instance of the amount of territory opened up by this well it is said on reliable authority that the Fisher Oil Company, which is the largest holder of territory, will be enabled to make in the neighborhood of about forty-five locations that will be considered first class in every respect. The fact it is a "good" and all of these locations when drilled in will be good wells.

The excitement in Sistersville and in all places where oil men are located, in regard to this strike, is intense. Since the well has been drilled in there have been hundreds of oil men over to see it and incidentally on the side trying to pick up a piece of territory, but this is next to impossible, as the companies which were first on the scene have taken care that no loose territory is in evidence. It is estimated that at present there are in the neighborhood of 25,000 acres of ground under lease. It is known that all of the territory from the Ohio river to New Castle and Cameron on the east and west lines has been taken up, and in many cases for miles back of both of these places. This will give a scope of territory of about twelve miles square to be developed and it will be developed in a very short time.

Since the well on the McFarland farm was drilled in the company owning it has made locations for eight wells on the forty acres and is drilling on the lines. The companies who own the territory on the other side of the river are also making arrangements for drilling their holdings and it is estimated that within the next thirty days there will be not less than thirty new wells started and probably twice that number. The work will be rushed as rapidly as possible, as all of the companies want to get in on the ground floor for the cream of the new production.

There is every reason to believe that an immense oil field has been opened up by the Benwood development, and that this will be proven in a very short time. As an instance of the belief held by the operators that it is good stuff the number of wells is given. Then again, one of the reasons why this territory is believed to be so good is that the formations are almost identical with those in the old Sistersville field. In the old field the first salt water ever gotten in an oil field was encountered, and that had much to do with the slow development of the field. However, when a device was made for the handling the water the field rapidly developed into the greatest and best of its kind ever known in the history of the business. The Benwood is a salt water territory, but the operators have the advantage over there, as they know how to handle the briny fluid. There has never been an oil field that has produced the amount of oil the old Sistersville field has given and held up as long as it, and it is believed that the Benwood territory will be a repetition of that field.

There are a number of good wells that will be due this week and among them is that of Ramey & Co., on the Stalder farm, located about three-quarters of a mile east of present developments. This well has been delayed for almost three weeks by various small accidents, principal among which was a heavy down which encountered about ten days ago, which compelled them to put in a string of 4½-inch casing. This well is expected in about the middle of this week and its advent is anxiously expected. A great deal of interest is manifested in this well for the reason that it is so far ahead of present developments and will open up a new territory. It is believed to come in a good producer. There are several other wells on all sides of present developments that are due the coming week.

There is a bit of interesting history connected with the opening up of the Benwood territory that will be worth repeating. In 1881, about a year and a half ago, the Henry Oil Company, one of the largest concerns operating in the lower southwest, leased all the territory in that section and commenced to put down a well on the Holtselaw farm. The operators in this field thought the Henrys were insane in putting a well down in that part of the country, as only a short distance behind them, toward the Sistersville field, several good wells had been drilled. The Henry company went ahead and drilled the well, which came in good for about eight or ten barrels a

day. This was not considered large enough to pay and all of its holdings except the Holtselaw farm, amounting to several thousand acres, were thrown up and the territory abandoned. The Fisher Oil Company, another large concern, was not of the opinion of the other operators, and believed that there was some oil to be found. In a very short time after the Henry Oil Company gave up its lease in that section, the Fisher company sent out a man to lease everything he could get hold of. The man worked almost a year and succeeded in getting many thousands of acres at a very small price. Last spring the Fisher company concluded it would drill a well and located one but a short distance from the well drilled by the Henry Oil Company. When the well was drilled to the top of the sand it showed up for a good producer and it was drilled in very carefully and the derrick boarded up so none of the scouts of the other companies could learn what the calibre of the well was. The Fisher leaser was kept busy for a few days longer and, finally, it being evident that the well was coming in of its own accord, if the company did not drill it in, it was thought best to drill in, which was done. The well proved to be a producer of about 200 barrels a day and it created a great deal of excitement. At first not a great deal was thought of this stuff by outside parties and very little effort was made to get in on it, but later on the wells commenced to get larger and the territory expanded, the excitement grew until it is now at fever heat and it is impossible to get a piece of territory for love or money.

The indications at present are that the Benwood pool will be the greatest pool that has been opened up for a long time, and that Sistersville will reap a harvest from the developments during the winter and spring.

A Camera Club.
Wheeling devotees of the camera are considering plans for the formation of a camera club this fall, and it is likely that

their efforts will meet with success. It is proposed that a lantern exchange membership be secured and weekly or fortnightly exhibitions be given. It is also proposed to fit up cozy quarters with "dark rooms" and other conveniences. There are many enthusiastic amateur photographers in Wheeling and the surrounding towns, who will gladly assist in organizing a club.

A Social Event.
The Yarker-Newby wedding on Thanksgiving evening will be one of the most elaborate of social events in colored circles here this season. The groom, Mr. Yarker, is well known in Philadelphia, and the bride, Miss Lizzie Newby, is the daughter of Mrs. Newby. The ceremony will be performed in Simpson M. E. church, by the pastor, Rev. Mr. Walker. The ceremony will be followed by an elaborate reception in the assembly hall at the I. O. O. F. building.

The Benwood Southern.
The Benwood Southern electric road is enjoying a good patronage which is increasing every day. Two cars are now being run, but Receiver Hazlett has secured an order from Judge John J. Jackson, of the United States court, for the purchase of another car, which will enable the receiver to start a half hour service. Additional rolling stock will be secured as the patronage justifies it.

Death of G. W. G. Ferris.
In yesterday's Intelligencer the news of the death of G. W. G. Ferris, the well known bridge builder, who is known to fame as the inventor of the World's Fair Ferris wheel, was chronicled. Mr. Ferris was the builder of the steel bridge at Eleventh street, crossing the main channel of the Ohio, and was well known in Wheeling.

THE NEW SCHOOL

Building that will be Occupied by the Cathedral School

ONE OF THE FINEST IN TOWN.

It is to be Completed and Ready for Occupancy About New Year's—It is a Brick and Stone Structure, Costing About \$45,000—Of Gothic Design It is a Striking Piece of Architecture—A Description of the New Building.

During the past four months, Rev. Father Boutou, rector of St. Joseph's Cathedral, has been a very busy man, for upon his shoulders has devolved the task of supervising the construction of the handsome and modern brick and stone structure that replaces the old building so long occupied by the Cathedral parish schools, on Fourteenth street at the corner of Byron.

The plans for the new building were prepared early last spring by Architects Franzheim, Giesey & Faris, but it was not until June that the work of demolishing the old building and erecting the new began. Work was pushed, with the zeal of Father Boutou, as an incentive, at such a rate that very soon after the approaching New Year the building will be ready for occupancy.

The building is of stone foundations and brick walls, three stories in height with a finished basement, costing, aside from the expense of demolishing the

old building which is replaced, about \$25,000. The basement is divided into two sections which are intended as playrooms for the boys and girls respectively. On the first floor there are four large rooms, all well lighted with good ventilation, and a principal's office. The second floor is divided into two class rooms and four school rooms, while the third floor is to be used as an assembly hall, being provided with a stage and ante rooms. There are no posts or other obstructions on this floor.

The contracts for the building were awarded as follows: General contract, Wood Brothers, brick-work, Hamilton Brothers; stone work, Thomas Jackson; painting, D. C. Kurner; slate and tin work, Kurtz & Coffee; plastering, William Stoetzer; steam heating apparatus, Trimble & Lutz Company, all of Wheeling.

The building will be occupied with imposing ceremonies soon after its completion and will be occupied by the school in early 1897. The new building is another instance of the progressive ideas of Right Rev. Bishop Donahue, of the Wheeling diocese.

AMUSEMENTS.

The audience at the Opera House last evening was one of the most composite that has been seen there this season, and the performance was in keeping with the audience. It was an entertainment that attracted some people who seldom occupy seats there on account of scruples and principle. Nothing offered on the programme offended the "taste of the most fastidious." The Vitascopes was a revelation to those who had never journeyed east, but had heard of Edison's wonderful improvement over the kinoscope. The pictures presented by this wonderful mechanism charmed the audience to untiring applause. So natural was the reproduction of scenes in life that, in many instances, one could almost hear the conversation.

The Robinson's in their descriptive duet of electric stereopticon pictures, were entirely captivating, leaving a moral atmosphere and an educational lesson behind. "A Pack of Cards," "My Mother was a Lady," and other burlesques that appealed to the deepest feelings that stir the heart of humanity.

As an athletic diversion the Robinson-Baker trio proved to be one of the most attractive features of the evening's entertainment. The graceful, greyhound leaping of Mr. Robert H. Baker startled the people, who, on realizing what he had done, broke out in salvos of applause. Mr. Baker held the record for his feat, and has an open challenge for all around competition, with weights. The microphone also gives a pleasant diversion during the waits for the incomparable and startling life-like reproductions of the Vitascopes. The Holbrooks, and Mr. Weston contributed their talents to an entertainment that was satisfactory and unobjectionable in no one should miss. The combination will be at the Opera House to-night, with an entire change of Vitascopes pictures and other features. It is really one of the most solidly enjoyable entertainments Col. Reister has offered this season.

One of the Best.
The Grand Opera House was packed last night by one of the most enthusiastic audiences of the season to witness the first production here of "A Booming Town." Everybody laughed and applauded, for it is the funniest comedy seen here this season. It is merely put together to give a lot of people a chance to show their ability as specialty people, but with "A Booming Town" it is different. There is an interesting plot, a very funny story; the piece is staged with all special scenery, representing the seaside and all the bathers; also the second act, showing the only drug store in "A Booming Town," and the third act showing the parlors at Boomville hotel. Pleasing specialties are introduced by Phil and Nettie Peters, the Putnam sisters, Billy Link and others. "A Booming Town" will be the attraction at the Grand including Thanksgiving afternoon and evening.

"The Fast Mail."
On next Friday and Saturday evening the doors of the Grand Opera House will swing wide open for the great scenic production of Lincoln J. Carter's "Fast

Mail." The railway has often been used by the dramatist, but never before to such an extent as in Carter's famous play, "The Fast Mail." A freight train with fourteen cars, a lighted caboose and a full-size locomotive, with engineer and fireman, crosses the stage in the most realistic and noisy manner, while later in the play a great Mississippi river steamboat, with bells and whistles and engines in full operation, moves in and explodes with terrific force.

A MAN SHOT
Accidentally Shot while Out Hunting Yesterday—The Matter was Kept Quiet.
A report reached the city late last night that a man had been accidentally shot while hunting, beyond Elm Grove, yesterday afternoon about 4 o'clock. It is said he was quite seriously wounded. The victim, in company with several companions, all of whom are Wheelingites, were hunting when the gun of one of the men was accidentally discharged and the load of shot struck the man, whose name could not be learned, in

the hips and legs. The affair was kept rather quiet and the names of the parties could not be ascertained.

Found the Watch.
A stranger entered police headquarters yesterday and complained that he had been "touched" for his gold watch and chain while out "seeing the elephant." He hadn't the least idea where he lost the "ticker," but Officer Michaels succeeded in locating it, and returned it to the owner last night.

Factory Hands Strike.
RICHMOND, Va., Nov. 23.—About one hundred men employed at the factory of the Virginia and North Carolina Wheeling Company, went out on a strike to-day on account of a ten per cent reduction in wages.

"I was completely covered with sores. Every limb in my body ached. Had been sick for five years. Doctors could do me no good. Most of my time was spent in bed. I was a complete wreck. Burdock Blood Bitters have completely cured me in three months." Mrs. Annie Zoepfen, Crookston, Minn.

Bank
President Isaac Lewis of Sabina, Ohio, is highly respected all through that section. He has lived in Clinton Co. 75 years, and has been president of the Sabina Bank 20 years. He gladly testifies to the merit of Hood's Sarsaparilla, and what he says is worthy attention. All brain workers find Hood's Sarsaparilla peculiarly adapted to their needs. It makes pure, rich, red blood, and from this comes nerve, mental, bodily and digestive strength. "I am glad to say that Hood's Sarsaparilla is a very good medicine, especially as a blood purifier. It has done me good many times. For several years I suffered greatly with pains of

Neuralgia
in one eye—and about my temples, especially at night when I had been having a hard day of physical and mental labor. I took many remedies, but found help only in Hood's Sarsaparilla which cured me of rheumatism, neuralgia and headache. Hood's Sarsaparilla has proved itself a true friend. I also take Hood's Pills to keep my bowels regular, and like the pills very much." ISAAC LEWIS, Sabina, Ohio.

Hood's Sarsaparilla
Is the One True Blood Purifier. All druggists, \$1. Prepared only by C. I. Hood & Co., Lowell, Mass.

Hood's Pills are prompt, efficient and easy in effect. 25 cents.

Cinderella Stoves and Ranges

... IS DUE ...

To good material, perfect workmanship, and a thorough knowledge of the wants of the household. Every feature to promote durability, cleanliness and economy has been well planned and developed. If you buy a CINDERELLA you run no risk; they are good bakers and perfect roasters. Call and examine them at

NESBITT & BRO.'S,

City Agents, 1312 Market Street.

EDUCATIONAL

MRS. HART'S

School for Young Ladies and Children,

1316 and 1318 Market Street.
